AMR KARIM

Full-Stack Developer | Angular & ASP.NET Core | Application Security

Cairo, Egypt | +20 100 328 6392 | amrkarim000@gmail.com | linkedin.com/in/amru-karim-7927042a2 | github.com/3MR-Karim

PROFESSIONAL SUMMARY

Full-Stack Developer with 1.5+ years of experience shipping production Angular and ASP.NET Core 8 applications, backed by a hands-on cybersecurity background (CEH, 47/50). Builds clean, scalable REST APIs and responsive interfaces using Clean Architecture, SOLID and EF Core, and secures them by design with JWT authentication, role-based access control and OWASP Top 10 awareness. Works well across frontend, backend and security teams in Agile environments.

CORE SKILLS

Frontend: Angular, TypeScript, RxJS, NgRx, Angular Material, HTML5, CSS3, Sass, Bootstrap
Backend: C#, ASP.NET Core 8, Web API, MVC, SignalR, Entity Framework Core, Dapper, LINQ, SQL Server
Architecture: Clean / Onion / N-Tier, CQRS (MediatR), Repository, Unit of Work, SOLID, RESTful APIs, JWT, RBAC
Security: Web & API penetration testing (OWASP Top 10), secure code review, Burp Suite, OWASP ZAP, Nmap, Wireshark, Metasploit
Tools: Git, GitHub, Docker, Postman, Swagger, Python, Bash, PowerShell, Jira, Agile / Scrum, Linux

PROFESSIONAL EXPERIENCE

Full-Stack Developer — Digital Lab | Apr 2025 – Present

- Build and maintain two production Angular applications (Jiwar Platform, Lab Portal) used by real customers and internal teams.
- Develop ASP.NET Core 8 APIs with Clean Architecture, Repository and Unit of Work patterns, EF Core + LINQ (pagination, filtering, sorting), AutoMapper/DTOs and JWT authentication.
- Create reusable Angular components and lazy-loaded modules to cut bundle size; integrate REST APIs with RxJS and handle loading and error states.
- Implement role-based access control with route guards and auth interceptors; build data tables and reactive forms with Angular Material and NgRx.
- Define API contracts with the backend team; take part in code reviews and Agile sprints.

Cybersecurity & Penetration Testing Trainee — IT Gate Academy | Apr 2025 – Present

- One-year offensive security program (network, OS, web, mobile) aligned with OSCP, CEH and OWASP; currently preparing for OSCP and eWPTX.
- Test web apps and APIs for XSS, SQLi, IDOR, SSRF, CSRF and authentication flaws; assess networks and Linux/Windows hosts with Nmap, Burp Suite, Wireshark, Metasploit and Hydra.
- Automate recon with Python/Bash and document findings with proof of concept, risk rating and remediation steps. Active in HackerOne bug bounty programs.

Backend .NET Core Trainee — Route Academy | 2024

- Intensive training in C#, SQL Server, LINQ, EF Core, Web API, MVC, design patterns and RESTful APIs in an Agile setting.

SELECTED PROJECTS

- **Jiwar Platform** — Angular, TypeScript, RxJS — community platform connecting neighbors and local businesses with search, filters and user dashboards (live).
- **Lab Portal** — Angular, NgRx, Angular Material — internal lab management portal with RBAC, admin dashboard and full API integration.
- **FoodApp API** — ASP.NET Core 8, Onion Architecture, CQRS, MediatR, JWT — testable business logic and fast read endpoints with EF Core projections.
- **E-Commerce & HR Web API** — EF Core, AutoMapper, JWT, SQL Server — accounts, basket, payments, products, employees and webhook integration.
- **Hotel Reservation System** — ASP.NET Core 8, Repository Pattern — search, reservations, cancellations and payments with async code and DTOs.
- **Virtual Try-On (in development)** — Angular, MediaPipe — live camera try-on of clothes for online shoppers.

CERTIFICATIONS

Certified Ethical Hacker (CEH), score 47/50 | CCNA | MCSA | Linux & Red Hat | In progress: OSCP, eWPTX

EDUCATION

Bachelor of Commerce (English Department) — Damanhour University, 2020 – 2023
Backend Development Diploma, .NET Core — Route Academy, Cairo, 2024

LANGUAGES

Arabic — Native | English — Professional working proficiency (B2)
